

WS type replacement method for bottom battery.

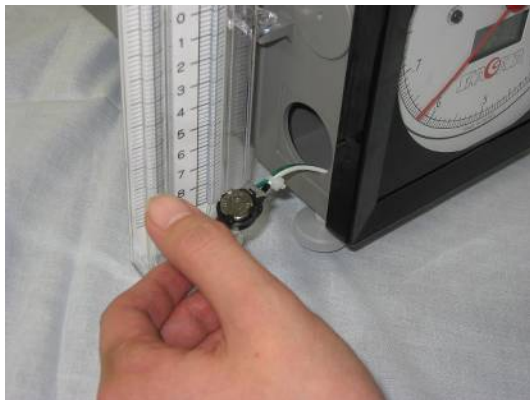

There is a cap (rubber) for battery box at the left side of front panel.

Rubber cap

To take away the cap from the upper part.
(There is a catch at the inside of cap)

To take away a battery from the box.
(to open metal hook to outside is easier)
To insert new battery with attention for hook, and to confirm that the hook holds battery.

*If the cap is pull strongly or pull exceed, which can leads to the breaking a wire.

Attach from the lower part and confirm back to the normal, which the inside catch of cap is held to gas meter body.

Please refer to PIC 1
